```
 1  Graham Leslie
 2  Sarah Vance
 3  Ryan Finke
 4  CSCE 315 Project 1 Team 26 Individual Report
 5
 6  Multipliers:
 7  Graham Leslie:        1.5
 8  Sarah Vance:          1.5
 9  Ryan Finke:           0
10
11  "These multipliers are a true and accurate assessment of our relative
…   contributions on the project.  We all agree that that these are honest
…   evaluations and are satisfied with the final decision."
12
13  Explanation:
14  + Ryan Q-dropped the course after writing 2 or 3 helper functions, and
15    did not notify the rest of the team until the night the database was
16    due.
17
18      + He caused serious problems (as we had delegated work to him that
19          we had to pick up immediately before the project was due).
20      + The other team had been attempting to contact him, and he gave
21          them no response that he was no longer a part of the project.
22      + We found out, also the day the database was due, that Ryan had
23          sent our alternate team a DLL file but forgotten the LIB file,
24          and they had been attempting to reach him all week looking for
25          the LIB.  We managed to get them a LIB file, but it may have
26          been too late for them to use our database.
27
28   + Sarah and I (Graham) equally and fairly divided the work ourselves,
29     and saw that it was done.
